Philadelphia, Pennsylvania

Target Audience

This educational activity is designed for neurologists and other health care professionals interested in or involved with the management of patients with Parkinson's disease.

Learning Objectives

- Discuss how early detection and treatment of PD can affect disease progression.
- Review the advantages and disadvantages of the currently available treatment options for PD.
- Consider the adverse effects (e.g., dyskinesias) associated with levodopa therapy.
- Describe the potential role of neuroprotection in PD.
- Discuss neuropsychiatric symptoms of PD, including depression and impulse control disorders.

Accreditation

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint sponsorship of The University of Pennsylvania School of Medicine and Liberty Communications Network. The University of Pennsylvania School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Designation of Credit

The University of Pennsylvania School of Medicine designates this educational activity for a maximum of *2.0 AMA PRA Category 1 Credits*.™ Physicians should only claim credit commensurate with the extent of their participation in the activity.

Jointly Sponsored by

This activity is supported by an educational grant from
Boehringer Ingelheim Pharmaceuticals, Inc..
